PROFESSIONAL SUMMARY

Computer Science graduate (BA, New Mexico State University, Fall 2026) with hands-on experience building a compiler and collaborating on an Agile team project, plus a background in teaching and technical support. Strong in Java, Python, C, and C++, with a solid grounding in software testing, algorithms, and clear communication. Open to entry-level opportunities across software development, web development, databases, security, networking, and technical roles.

EDUCATION

BA in Computer Science – New Mexico State University

Las Cruces, NM

Expected Graduation: Fall 2026

Relevant Coursework: Software Development, Modern Web Technologies, Introduction to Intelligent Agents

AA – Northwest Early College High School*El Paso, TX*

Graduated Spring 2023 | Relevant Coursework: Mobile App Development

HONORS & AWARDS

NCWIT Aspirations in Computing Award

2023

TECHNICAL SKILLS

Languages: Java, Python, C/C++

Testing & Tools: JUnit, JaCoCo (code coverage)

Practices: Agile methodology, sprint planning, technical documentation, algorithmic problem-solving

PROJECTS

Constellist – Software Development Final Project

Team Project

- Collaborated with a team to design and build a task-management app that visualizes progress as constellations.
- Used Agile methodology to plan and coordinate sprints, balancing feature development with team deadlines.
- Contributed to design, implementation, and documentation across the software development lifecycle.

Compiler Project*Course Project*

- Built a compiler for a custom language, implementing lexical analysis, parsing, abstract syntax tree (AST) construction, and code generation.
- Applied ALGOL-C language concepts and compiler design principles to translate source code into executable output.

PROFESSIONAL EXPERIENCE

Code Sensei – Code Ninjas

Nov 2024 – Apr 2025

El Paso, TX

- Mentored K-8 students through hands-on game development projects, reinforcing core programming concepts.
- Led interactive coding workshops across multiple age and skill levels, adapting instruction to keep students engaged.
- Tracked individual student progress and delivered personalized feedback to support skill growth.
- Simplified complex computer science concepts into clear explanations, improving student comprehension and confidence.

Sales Tech Associate – Staples

Nov 2023 – Mar 2024

Las Cruces, NM

- Provided prompt technical support, diagnosing and resolving customers' hardware and software issues on the spot.
- Configured customer computers, including software installation, system setup, and testing.
- Managed invoicing for hardware and software repair services, ensuring accurate billing and record keeping.
- Organized and maintained merchandise displays to support store efficiency and customer experience.

LEADERSHIP & ACTIVITIES

Computer Science Honor Society

- Co-organized and facilitated CS outreach activities for CS Education Week.
- Competed in multiple collegiate coding competitions, applying algorithmic problem-solving under time constraints.
